1. **Introduction**

Congratulations on your purchase of the USB-Serial adapter. This device provides a simple and easy way to connect Universal Serial Bus (USB) and Serial port interface.

With the advantage of USB port, users have the capability to utilize the peripheral with serial port interface in an easy to use environment such as plug and play & hot swap function. This adapter is designed for ideal connections to Cellular Phone, Digital Camera, Modems or ISDN terminal adapter with over 120k bps data transfer rate.

The USB-Serial adapter and software drivers are capable of providing a no-firmware-change feature that enable USB interface to be transparent to serial port peripherals with minimum modifications.

2. **Package Content**

- Hardware: USB-Serial adapter, USB type A to type B cable
- Software: USB-Serial driver on CD-ROM

3. **Product Features**

- USB Specification Rev. 1.1 compliant
- Support the RS232 Serial interface
- Over 120k bps data transfer rate
- Support remote wake-up and power management

4. **System Requirements**
